SPACE LAMA

Preface

Dear friends and supporters of Space Lama e.V.,

The year 2021, the second year of our association, seamlessly continues the still young success story of our (still) small association. Although we had to struggle with the COVID-19 pandemic this year, we met the challenge thanks to the tireless voluntary efforts of our members. Without the support of you, dear supporters, our efforts would have been without result, they would even be without any meaning. Your support also gives us the necessary mental strength - it gives us meaning. Therefore, our gratitude first and foremost goes to you. Thank you!

New Members

The growth of the Space Lama project is also reflected in the form of new members. We can welcome all those who stand one hundred percent behind the values of Space Lama and whose individual qualities make them a valuable addition to our association. For example, we now have a professional translator, a social worker, more social media expertise and, last but not least, more people who carry our message into the world full of conviction.

Since 2021, it has also been possible to conclude a supporting membership with us. To make this possible, a corresponding amendment to the articles of association had to be made. The supporting members thus receive all relevant information about the internal processes of the association.

Highs and Lows

Despite the Corona pandemic, we were able to use the warmer months to draw attention to our non-profit association. Among other things, we succeeded in doing so by participating in the Praerie Festival in Galenbeck and the Tension Festival in Chemnitz. At the Berlin Club Wilde Renate as well as at the Markt der Möglichkeiten in Homburg, we got the opportunity to set up a booth. We also participated in a charity event, which was initiated by the student community of the Saarland University. Hamid gave a lecture there, which was very well received by the audience. Another event in the Wilde Renate had to be postponed due to the pandemic, but it will probably take place next year.

Rescues and Successes

What impact our work had on the fight against child prostitution and abuse in the Philippines? In 2021, a total of twelve children were rescued. Their individual fates clearly demonstrate the immense importance of this project.

Joy (17) and Marian (15), two sisters who experienced sexual violence in their family, were able, in addition to being freed from these circumstances, to pave the way for their future in the medical field as PREDA provided them with access to education.

José (16), who had to endure a terrible odyssey in search of his biological father, became a victim of robbery, among other things, on his search. He also found support and a new home at PREDA.

Sophia (17) suffered immensely from the death of her mother and became a survivor of human trafficking and prostitution. At PREDA, she was able to receive help in the form of emotional detoxification therapy.

Gabrielle (16) comes from a family in which dropping out of school and child labor is the norm. All too often, families simply find schooling too expensive. During her still young life, Gabrielle then came into contact with a human trafficker, who was later successfully convicted to the local authorities. Since her arrival at PREDA, she has received psychological help and support for her education.

Lyra (15) is in need of special protection while in the care of PREDA, so that the success of the upcoming court case against her perpetrator does not fail. Among other things, the protection is intended to prevent Lyra from retracting her statements against the former operator of the sex bar where she was exploited.

In Joana's family, drug trafficking and abuse are on the agenda. Physically severely neglected, she therefore came into the care of PREDA, where she required special medical care and underwent the psychological care of a specialized drop-in center.

As the oldest sister, Jackie (14) bore a lot of responsibility early on. At the age of eleven, she took over household management and began working in a market and prostituting herself to feed her family. Later, she fell into alcohol and drug use. Through a disguised

police operation, she was then freed from the abusive structures and later PREDA granted her care.

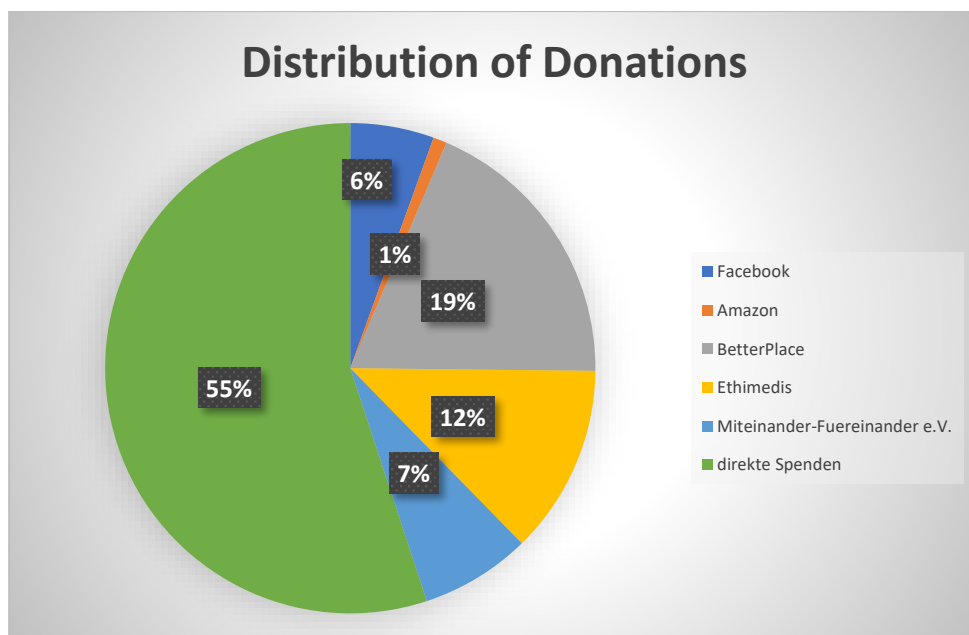

Marielle (15) lost her father due to a Corona infection. Thus, she also came into contact with drugs and alcohol at an early age. Through toxic acquaintances and financial hardship, she was eventually lured into prostitution. Her pimp was later arrested in an undercover police operation and Marielle was taken in by PREDA.

Financial Overview

We had big plans for the 2021 event season, but unfortunately, due to the Corona pandemic and the resulting very reduced offer, we were only able to be present at the events already mentioned. Despite the low event presence, we were able to record encouraging income of just under €4,000 through the sale of Space Lama items. However, we also invested a lot in the pre-production of the items, which is why we were not able to book any real profits, but only cover the production costs. However, we are already looking forward to being able to offer the previously unsold articles next year and are sure that the coming year will once again exceed our expectations. The enormous donations totaling **13,732.02 €** confirm once again that we are on the right track and that our work is well worth it! Through our online store we were able to collect another 722,52 €. The following figure shows the distribution of the donations. In the attachment you will find more details about the annual balance sheet.

Outlook

2022 is the year Space Lama hopes to hit the ground running. As a project that lives on oral advertising, we hope for even more expansion - the stone should then really start rolling, so to speak. Because with Space Lama e.V. we founded an association with vision and a vision with future.

Other festivals (such as the popular Fusion) should lead us to further and more widespread recognition. Our website should also be given a new polish with a new design and technical expertise. Being up to date and technical know-how should always be in the foreground for a young association. New articles like socks and gym bags are planned and currently in preparation for production. First drafts of these strengthen our conviction that people will continue to find our design just as appealing as they did with the first T-shirt editions.

Last but not least, one of our most important undertakings next year is, of course, a first visit of Space Lama to the Philippines, which was not possible this year due to Corona. With this visit we want to intensify our connection to PREDA, get to know the foundation and our Lama Children personally, get an idea of the work on site and improve processes.

Acknowledgement

We would like to express a special thank you to Ethimedis® and Miteinander-Fuereinander e.V. and of course to Everyone for the overwhelming private donations (which make up over 50%)!
